COURSE TITLE: Clinical Periodontology II

COURSE CODE: PCS 413

CREDIT HOURS: 4 hours (1 hour Lecture & 3 hours Clinic)

PREREQUISITES: PCS 313

COURSE DESCRIPTION:

This course consists of a didactic and clinical component with four credit hours. This course is given to the fourth year students with the objective of teaching them how to do diagnosis, prognosis and comprehensive treatment plan that include surgery. It will cover:

1. The treatment of advanced forms of periodontal diseases.
2. The interrelation between Periodontics and other dental specialties.
3. Introduction to the surgical approaches in the management of moderate to advanced periodontal diseases
4. Overview of the Surgical implant procedures and implant maintenance
5. Communication, Presentation and Writing Skills Development
6. Introduction to evidence based and problem based learning

COURSE OBJECTIVES:

At the end of this course the student will be able to:

1. Perform a comprehensive diagnosis and prognosis 1.2, 1.3, 2.1
2. Formulate treatment plan that includes specific surgical approaches 1.3, 1.4, 2.2, 2.3
3. Motivate and Train patients to perform oral hygiene techniques 1.4, 5.1
4. Practice subgingival scaling and root planing. 1.4, 5.1
5. Identify the indications and procedures of periodontal surgical techniques 1.4
6. Evaluate the result of the performed periodontal therapy and plan the long-term result. 2.2
7. Identify recent materials and techniques in periodontal therapy 1.8
8. Recognize the role of trauma from occlusion in the etiology of periodontal disease 1.2
9. Identify peri-implant structures. 1.4
10. Identify the surgical procedures in implant dentistry from a periodontal point of view 1.4
11. Demonstrate improved communication, presentation and writing skills 3.1, 3.4, 4.1
12. Distinguish between Evidence based and problem based learning and apply it to the treatment approaches 2.3

CLINICAL COMPONENTS

This second part of this course will involve the treatment of patients with periodontitis. Upon completion of this part, the student should be able to:

- Discuss the etiology; diagnosis, prognosis and treatment plan for Periodontitis.
- Complete periodontal treatment of patients with different degree of severity and extent of disease, including routine preventive care and non-surgical periodontal treatment.
- Interpret and evaluate the treatment response.
- Discuss the surgical procedures such as Gingivectomy, periodontal flap surgery, and regenerative procedures.
- Describe regenerative periodontal techniques (bone regeneration and periodontal tissue regeneration).

COURSE CLINICAL REQUIREMENTS:

Students must satisfactorily complete the following minimum requirements:

Finish at least six (6) clinical cases:

- One case with generalized periodontitis including slight/moderate amount of subgingival calculus and/or systemic factors
- One case with generalized periodontitis case including moderate/severe amount of subgingival calculus systemic factors

- One submitted surgical report case including either crown lengthening procedure or conventional periodontal surgery (open flap debridement or modified Widman flap) or implant Fixture placement.
- One moderate to severe periodontitis re-evaluation case treated **from the students own patients**
- One recall and periodontal maintenance case treated by the student or any other colleagues
- Clinical case presentation based on evidence based learning and/or problem based learning
- Any additional cases will be considered positively in your clinical grading.

COURSE PROTOCOL:

- Screening of clinical cases by the **COURSE DIRECTOR** is mandatory.
- Approval of the **COURSE DIRECTOR** to dismiss or transfer patients is mandatory.
- The **COURSE DIRECTOR** should approve a selected clinical case for the final competency clinical examination.
- **SIGNING AND APPROVING** of the treatment plan is mandatory before starting the treatment procedures
- Students are expected to perform **satisfactorily** in both clinical and written components of the course
- The Clinical Evaluation Form will be strictly followed for each clinical procedure, and the instructor must sign each step during the session.
- All report of the assigned patients should be kept with the student.
- The student should maintain discipline with regards to attending the clinic sessions on time.
- The students are expected to maintain a good relationship with his/her patients, colleagues and instructor alike.
- The student must always observe cleanliness and neatness in appearance and wear their proper clinical gowns during the clinical session; otherwise they will not be allowed to perform their clinical procedures.
- It is the responsibility of the student to complete the patient's permanent file, indicating clearly the Name, university number and signature of the students.
- At the end of each clinical session the student should obtain the signature of the instructor. A temporary file is not acceptable.
- The patient's file, without the signature of the assigned instructor, shall be considered as an incomplete clinical procedure, and will affect your daily grade.
- In a situation where the patient is unable to attend the clinic, the instructor should immediately be notified.
- Students should attend the clinic session despite the absence of their patients.

- Each student must fulfill the minimum treatment requirements of the course (6 patients).
- The quality of treatment for each clinical step provided will be of primary concern in the assignment of the final grade.
- Regularity, punctuality & adherence to college didactic & clinical regulation in treating patients must be strictly observed and will be graded.
- Your instructor will continually monitor your clinical skills, behavior and patient management.
- All patients under the student's care will undergo routine evaluation.
- Scaling and root planing will be evaluated on a quadrant or sextant basis.
- The STUDENT is responsible to assure that his/her clinical work is regularly evaluated.
- The clinical mark will be affected if the Student will show:
 - ▶▶ Poor management of the case
 - ▶▶ Repeated ignorance to given instructions
 - ▶▶ Unacceptable behavior with patients and/or clinical instructors.

- Student who fails to finish the clinical work during the allotted clinical time per session will receive a zero mark. Another Zero (0) will cancel the clinical requirement for that case with the student continuing to treat the clinical case.
- All performed clinical procedures should be recorded in the patient's file.
- It is the Student responsibility to prepare the clinic before starting the treatment. Radiographs, treatment plan, saline and sharpened instrument should always be available in the clinic.
- Attendance to the lectures and the clinic is mandatory. Being 10 minutes late to the lecture or 15 minutes late to the clinical session will be considered as absence affecting the student's evaluation.
- King Saud University rules and regulations stipulate that missing 25% of the lecture or the clinical sessions will deprive the student from setting in the final exam.
- It is the students responsibility to coordinate with the Booking Area for patients appointments
- Student who does not fulfill the all the above-mentioned items will have their final grade negatively affected

MEASUREMENT AND EVALUATION:

To pass the course you should have passing grades in both the didactic and clinical parts. The student should pass both the final written exam and the final clinical exam.

Final mark will be calculated as follows:

A.	WRITTEN EXAMINATION	(40%)
	1. Midterm examination	20%
	2. Final examination	20%
B.	CLINICAL EVALUATION	(60%)
	1. Routine clinical evaluation	30%
	2. Final Clinical competency exam	20%
	3. Punctuality/Quizzes	10%
	 TOTAL	 <hr style="width: 50%; margin-left: auto; margin-right: 0;"/> 100%

ROUTINE EVALUATION MARKS:

This evaluation measures the quality of the work performed by the student during the management of his/her periodontal patients. Marks will be calculated using the point system depending on the case selection and the procedure:

- | | |
|---|----------------------|
| • Gingivitis case | 1 point out of 15 |
| • Slight periodontitis case | 1.5 points out of 15 |
| • Moderate periodontitis case | 3 points out of 15 |
| • Severe periodontitis case | 3 points out of 15 |
| • Re-evaluation after initial therapy of a case | 3 points out of 15 |
| • Recall of a finished case treated by student | 2 points out of 15 |
| • Periodontal surgery/implant case report | 1.5 points out of 15 |

REQUIREMENT MARKS:

- A clinical treated case will not be considered in the requirement until it has a passing grade of 60%.
- Any grade below 60% will only be counted in the routine evaluation.
- Accordingly each requirement case will be calculated in accordance with their type as the following:

Example: Student treats a slight periodontitis case (examination, diagnosis, treatment plan and initial therapy, scaling and root planing) and the calculated average of the case from student evaluation form is 80% then the point for this case is:

$$(80 \times 1.5) \div 100 = 1.2 \text{ out of 1.5 points}$$

Clinical Case Presentation (Oral) Exam:

- A group of six to eight students will be assigned to one faculty.
- Each group will be assigned an advanced periodontal case.
- Each student should make an evidence based comprehensive treatment plan
- A meeting between group members to discuss and submit only one type written comprehensive treatment plan (data, treatment plan, Reference) is mandatory.
- The final case report should be submitted to the supervising faculty **two days** prior to the oral case presentation.
- The time allocated for all presentation will be from 9am-12pm.

Note

- * Grading of the case report is out of 10 marks.
- * Incomplete or Failure to submit the report **two days** prior to the presentation will be given a failing grade

CLINICAL SCALING AND ROOT PLANING EXAM:

- Each student should perform a scaling and root planing examination in a selected quadrant of his/her ingoing clinically treated case
- Presence of moderate amount of subgingival calculus is mandatory
- The COURSE DIRECTOR should first approve the selected teeth.
- The Examination should only start with the approval of both the course director and the clinical supervisor.
- Duration of the clinical examination is one hour and a half (1:30)
- The timing for performing the scaling and root planning examination should be done during the **2nd semester TWO weeks BEFORE the end of the semester.**

SURGICAL PROCEDURE REPORT:

- The surgical procedure will be evaluated on the preparation, knowledge and a submitted report.
- The report should be type written and include:
 - Type of surgery
 - Detailed surgical procedure
 - Advantages and disadvantages of the procedures
 - Pre and post surgical radiographs and photographs.

- All photographs and radiographs should be documented and submitted on a flash disk with the report **TWO weeks after the surgical procedure.**

ROUTINE EVALUATION AND REQUIREMENT:

The final mark will account for 40% of the total marks of the course and it is distributed as follows:

- Routine evaluation 15%
- Clinical Requirement 15%
- Punctuality/Quizzes 10%

REQUIRED TEXT:

1. **Carranza's Clinical Periodontology**, 11th edition, Michael G. Newman, Henry Takei, Perry R. Klokkevold, and Fermin A. Carranza (editors), Saunders Elsevier, 2011.
2. **Color Atlas of Dental Medicine** 1, Periodontology, 3rd ed. Herbert F. Wolf, Edith M. Rateitschak-Pluss, Klaus H. Rateitschak, Thieme Inc., 2005.
3. Periodontal Division Clinical Manual

Periodontal, examination and evaluation forms:

The forms, lectures and the clinical manual required for this course can be downloaded from the website: <http://faculty.ksu.edu.sa/nashri/default.aspx>

413 PCS CLINICAL EVALUATION GUIDELINES

GRADE	CLINICAL PRCEDURE
	<p>Students will be evaluated for the following:</p> <ul style="list-style-type: none"> • Attitude • Professionalism • Cleanness of the field • Organization • Availability of the charting and x-ray • Scaling and root planing
90-100	<ul style="list-style-type: none"> • No injury to gingival tissue • No roughness left • Good knowledge • Complete removal of sub.& supragingival calculus
80-89	<ul style="list-style-type: none"> • No injury to gingival tissue • <u>Localized</u> roughness left • Complete removal of supra. & sub-gingival calculus
70-79	<ul style="list-style-type: none"> • Some injury to gingival tissue • Unable to detect localized areas of subgingival calculus • <u>Multiple areas</u> with root roughness left
60-69	<ul style="list-style-type: none"> • Obvious injury to gingival tissue • <u>Multiple areas with sub. & supragingival calculus</u>
<60 (Fail)	<ul style="list-style-type: none"> • Remarkable injury to gingival tissue • <u>Unable to detect huge amount of sub & supragingival calculus</u> • <u>Does no deserve to pass (unsafe)</u>

PERIODONTAL CLASSIFICATION

AAP 1999

GINGIVAL DISEASE	Plaque induced gingival disease	I-A1	Gingivitis associated with plaque only			
		I-A2	Gingival disease modified by systemic factors e.g. puberty, diabetes			
		I-A3	Gingival disease modified by medication e.g. phenytoin			
		I-A4	Gingival disease modified by malnutrition e.g. vitamin C deficiency			
	Non-plaque induced gingival disease	I-B1	Gingival disease of specific bacterial origin e.g. syphilis			
		I-B2	Gingival disease of specific viral origin e.g. herpes infection			
		I-B3	Gingival disease of fungal origin e.g. candidiasis			
		I-B4	Gingival disease of genetic origin e.g. hereditary fibromatosis			
		I-B5	Traumatic lesion of the gingival i.e. chemical, physical, thermal			
		I-B6	Foreign body reaction of the gingival			
PERIODONTITIS	Chronic Periodontitis	II-A1	Slight	1-2mm clinical attachment loss	Generalized >30% of sites involved	Localized <30% of sites involved
		II-A2	Moderate	3-4mm clinical attachment loss		
		II-A3	Severe	5mm or more clinical attachment loss		
	Aggressive Periodontitis	II-B	Absence of large amount of plaque and calculus		Generalized >30% of sites involved	Localized <30% of sites involved
	Periodontitis as manifestation of systemic disease	II-C	Such as periodontitis in acquired neutropenia or leukemia			
NECROTIZING PERIODONTAL DISEASE		III-A	Necrotizing ulcerative gingivitis			
		III-B	Necrotizing ulcerative periodontitis			
ABSCESSSES OF PERIODONTIUM		IV-A	Gingival abscess			
		IV-B	Periodontal abscess			
		IV-C	Pericoronal abscess			
PERIODONTITIS ASSOCIATED WITH ENDODONTIC LESIONS		V-A	Endo-perio lesion			
		V-B	Perio-endo lesion			
		V-C	Combined lesion			

PROGNOSIS CLASSIFICATION
McGuire & Nunn, 1996

GOOD	Control of the etiologic factors and adequate periodontal support as measured clinically and radiographically to ensure the tooth would be relatively easy to maintain by the patient and clinician assuming proper maintenance
FAIR	Approximately 25% attachment loss as measured clinically and radiographically and/or class I furcation involvement. The location and depth of the furcation would allow proper maintenance with good patient compliance.
POOR	50% attachment loss and/or class II furcations. The location and depth of the furcations would allow proper maintenance, but with difficulty.
QUESTIONABLE	>50% attachment loss resulting in a poor crown/root ratio. Poor root form, class II furcations not easily accessible to maintenance care, or class III furcations. ≥2+ mobility. Significant root proximity.
HOPELESS	Inadequate attachment to maintain the tooth in health, comfort, and function. Extraction is suggested.

LECTURE NO. 1

LECTURER: Dr. Reem AlKattan

TITLE: Introduction to the course and discussion of the course outline

AIM: Introduce the course objectives and ILOs

ILOs:

- Introduce the course
- Explain the course outline
- Clarify course objective
- Explain mark distribution
- Identify the course requirement
- Name the required text books

CLINICAL SESSION NO. 1

ORIENTATION:

- ▶▶ Assignment of Instructors
- ▶▶ PCS Clinical Evaluation Form
- ▶▶ PCS History and Exam Form
- ▶▶ PCS Diagnosis and Treatment Plan Form
- ▶▶ Clinical Competency Exam Form
- ▶▶ Sample Treatment Plan Form

LECTURE NO. 2

LECTURER: **Dr. Nuha Alomar**

TITLE: Classifications of Diseases and Conditions Affecting the Periodontium I and II

AIM: Clarify and classify diseases and conditions affecting the periodontium according to AAP 1999

ILOs:

- The students should be able to classify:
 - ▶▶ Gingival diseases
 - ▶▶ Periodontal diseases
 - ▶▶ Necrotizing periodontal disease
 - ▶▶ Abscess of the periodontium
 - ▶▶ Periodontitis associated with endodontic lesions
 - ▶▶ Developmental or acquired deformities and conditions

REFERENCE: ***CARRANZA's Clinical Periodontology 11th Edition Chapter (4)***

CLINICAL SESSION NO. 2

REVIEW OF:

- ▶▶ Data collection
- ▶▶ Clinical examination
- ▶▶ Radiographic interpretation
- ▶▶ Clinical diagnosis
- ▶▶ Prognosis
- ▶▶ Treatment plan

LECTURE NO. 3

LECTURER: Dr. Reem AlKattan

TITLE: The Surgical Phase of Periodontal Therapy and Classification

AIM: Explain the need for surgical periodontal therapy and classify it

ILOs:

- The students should be able to:
 - ▶▶ Identify the objectives of the surgical phase
 - ▶▶ Contrast between pocket elimination and pocket maintenance
 - ▶▶ Apply re-evaluation after phase I therapy
 - ▶▶ Demonstrate indications for periodontal surgery
 - ▶▶ Describe critical zones in pocket surgery
 - ▶▶ Explain methods of pocket therapy

REFERENCE: *CARRANZA's Clinical Periodontology 11th Edition Chapter (52)*

CLINICAL SESSION NO. 3

REVIEW OF:

- ▶▶ Non-Surgical Instrument
- ▶▶ Sharpening Stones
- ▶▶ Sharpening technique
- ▶▶ Seating positions
- ▶▶ Instrument grasping
- ▶▶ Finger rest

LECTURE NO. 4

LECTURER: Dr. Sumaia Alajlan

TITLE: Surgical Anatomy of Periodontium and Related Structures

AIM: Revise and maintain the important anatomical structures related to periodontal surgery

ILOs:

- The students should be able to:
 - ▶▶ Describe the anatomy of the maxilla and related structures
 - ▶▶ Describe the anatomy of the mandible and related structures
 - ▶▶ Identify the presence and locations of exostoses
 - ▶▶ Recognize the intraoral muscles in relation to periodontal surgery
 - ▶▶ Identify anatomic spaces

REFERENCE: *CARRANZA's Clinical Periodontology 11th Edition Chapter (53)*

CLINICAL SESSION NO. 4

- How to develop and improve Communication skills

REVIEW OF:

- ▶▶ Oral Hygiene instruction
- ▶▶ Patients Motivation
- ▶▶ Brushes and brushing techniques
- ▶▶ Interdental Cleaning Aids

HAJJ BREAK

LECTURE NO. 5

LECTURER: Dr. Bann Al Hazemi

TITLE: General Principles of Periodontal Surgery (Rationale and Objectives)

AIM: Introduce the rational and objectives of the general principle of periodontal Surgery

ILOs:

- The students should be able to:
 - ▶▶ Compare between outpatient and hospitalized patients in regards to periodontal surgery
 - ▶▶ Value the importance of Consent Form
 - ▶▶ Explain the surgical side effects

REFERENCE: *CARRANZA's Clinical Periodontology 11th Edition Chapter (54 pg 525)*

CLINICAL SESSION NO. 5

- Regular Patients

LECTURE NO. 6

LECTURER: Dr. Preetha Nath

TITLE: Instruments for Periodontal Surgery

AIM: Identify and recognize the different periodontal surgical instruments

ILOs:

- The students should be able to:
 - ▶▶ Classify the periodontal surgical instruments
 - ▶▶ Identify excisional and incisional instruments
 - ▶▶ Describe periosteal elevators
 - ▶▶ Compare between surgical curettes and sickles
 - ▶▶ Recognize the Surgical chisels and tissue forceps
 - ▶▶ Identify surgical Scissors, nippers and needle holders

REFERENCE: *CARRANZA's Clinical Periodontology 11th Edition Chapter (54 pg 531)*

CLINICAL SESSION NO. 6

- Regular Patients

LECTURE NO. 7

LECTURER: Prof. Nahid Ashri

TITLE: Sutures and Suture Technique

AIM: To describe and illustrate the different suturing materials and techniques used in periodontal surgery

ILOs:

- The students should be able to:
 - ▶▶ Recognize the anatomy of the needle
 - ▶▶ Describes the different types of suturing materials
 - ▶▶ Apply the most commonly used suturing techniques in periodontal surgery

REFERENCE: *Additional Reading*

CLINICAL SESSION NO. 7

- Regular Patients

LECTURE NO. 8

LECTURER: Dr. Aljohara AlSinaidi

TITLE: Periodontal Flap Surgical Procedures

AIM: To classify and describe the different periodontal flap surgical procedures

ILOs:

- The students should be able to:
 - ▶▶ Classify the periodontal flaps
 - ▶▶ Identify the design of periodontal flap
 - ▶▶ Describe and differentiate the different periodontal Incisions
 - ▶▶ Illustrate periodontal flap elevation
 - ▶▶ Explain the healing process after periodontal flap surgery
 - ▶▶ Describe the different periodontal flap techniques: Modified Widman, Undisplaced and Apically positioned flap.

REFERENCE: *CARRANZA's Clinical Periodontology 11th Edition Chapters (57 pg 550, 59 pg 562)*

CLINICAL SESSION NO. 8

- Regular Patients

PCS 413

1st Semester

9th Week

10 November 2014

LECTURE NO. 9

LECTURER: Dr. Marwa Shaheen

TITLE: Treatment of Gingival Enlargement

AIM: To define and recognize the different treatment options for gingival enlargement

ILOs:

- The students should be able to:
 - ▶▶ Recognize chronic inflammatory enlargement
 - ▶▶ Differentiate between periodontal and gingival abscesses
 - ▶▶ Describe gingival enlargement associated with drug
 - ▶▶ Recall leukemic gingival enlargement
 - ▶▶ Describe gingival enlargement in pregnancy and puberty
 - ▶▶ Analyze the recurrence of gingival enlargement
 - ▶▶ Describe the treatment options for gingival enlargement: Gingivectomy vs. Flap technique.

REFERENCE: *CARRANZA's Clinical Periodontology 11th Edition Chapter (58 pg 556)*

CLINICAL SESSION NO. 9

- Regular Patients

LECTURE NO. 10

LECTURER: Prof. Fatin Awartani

TITLE: Preparation of Periodontium for Restorative Dentistry

AIM: To understand the effect of different restorative and prosthodontics procedures on gingival health

ILOs:

- The students should be able to:
 - ▶▶ Comprehend the rationale for therapy
 - ▶▶ Appraise the importance of the biological width
 - ▶▶ Analyze the consequence of inadequate biological width
 - ▶▶ Explain the sequence of treatment
 - ▶▶ Recognize the steps for pre-prosthetic surgery
 - ▶▶ Appreciate the biologic considerations of the restorative treatment

REFERENCE: *CARRANZA's Clinical Periodontology 11th Edition Chapters (65 pg 608, 66 pg 610)*

CLINICAL SESSION NO. 10

- Regular Patients

LECTURE NO. 11

LECTURER: Dr Fatima AlAhmari

TITLE: Osseous Defects (Classifications and Diagnosis)

AIM: To classify osseous defects and make the proper diagnosis

ILOs:

- The students should be able to:
 - ▶▶ Identify the bone destructions caused by extension of gingival inflammation
 - ▶▶ Categorize the factors determining bone morphology in periodontal disease
 - ▶▶ Recognize the bone destruction patterns in periodontal disease

REFERENCE: *CARRANZA's Clinical Periodontology 11th Edition Chapter (14 pg 140)*

CLINICAL SESSION NO. 11

- Regular Patients

LECTURE NO. 12

LECTURER: Dr. Bann AlHazemi

TITLE: Resective Osseous Surgery

AIM: To explain and demonstrate the different bone resective surgical procedures

ILOs:

- The students should be able to:
 - ▶▶ Select the treatment technique rational
 - ▶▶ Recognize the normal alveolar bone morphology
 - ▶▶ Terminology
 - ▶▶ Identify the factors for selection of resective osseous surgery
 - ▶▶ Describe the osseous resective technique
 - ▶▶ Apply postoperative maintenance

REFERENCE: *CARRANZA's Clinical Periodontology 11th Edition Chapter (60 pg 572)*

CLINICAL SESSION NO. 12

- Regular Patients

LECTURE NO. 13

LECTURER: Dr. Noha AlOmar

TITLE: Regenerative Osseous Surgery I: Bone Grafting

AIM: To explain and demonstrate the different bone regenerative procedures using bone grafts

ILOs:

- The students should be able to:
 - ▶▶ Evaluate the importance of new attachment and bone regeneration
 - ▶▶ Recognize the regenerative surgical techniques
 - ▶▶ Comprehend the bone graft materials
 - ▶▶ Describe bone grafting procedures
 - ▶▶ Identify the factors influencing a successful outcome.

REFERENCE: *CARRANZA's Clinical Periodontology 11th Edition Chapter (61 pg 577)*

CLINICAL SESSION NO. 13

- Live demonstration of surgical instruments,
- Hands on workshop of periodontal flaps on animal head model

LECTURE NO. 14**LECTURER: Dr. Sumaia Al Ajlan****TITLE:** Regenerative Osseous Surgery II : Guided Tissue Regenerations**AIM:** To explain and demonstrate the different bone regenerative procedures using Guided Tissue Regeneration (GTR)**ILOs:**

- The students should be able to:
 - ▶▶ Define the different terminology related to GTR
 - ▶▶ Comprehend the objectives of the procedure
 - ▶▶ Recognize the GTR regenerative surgical techniques
 - ▶▶ Recognize the different regenerative surgical techniques
 - ▶▶ Differentiate between resorbable and non-resorbable membranes
 - ▶▶ Evaluate clinically and radiographically the results of GTR
 - ▶▶ Describe clinical applications of GTR

REFERENCE: *CARRANZA's Clinical Periodontology 11th Edition Chapter (61 pg 577, additional reading)***CLINICAL SESSION NO. 14**

- Live demonstration of surgical instruments,
- Hands on workshop of periodontal flaps on animal head model

PCS 413

1st Semester

15th Week

28 December 2014

**MIDTERM
WRITTEN
EXAMINATION**

LECTURE NO. 16

LECTURER: Dr. Aljohara Al Sinaidi

TITLE: Periodontal Plastic and Esthetic Surgery: I. Procedures to increase the Width of attached gingiva

AIM: To introduce and explain procedures used to increase the width of attached gingiva

ILOs:

- The students should be able to:
 - ▶▶ Describe the problems associated with attached gingiva
 - ▶▶ Identify shallow vestibule
 - ▶▶ Diagnose aberrant frenum
 - ▶▶ Distinguish the different techniques to increase the width of attached gingiva
 - ▶▶ Differentiate between frenectomy and frenotomy
 - ▶▶ Comprehend the criteria for technique selection.

REFERENCE: *CARRANZA's Clinical Periodontology 11th Edition Chapter (63 pg 595)*

CLINICAL SESSION NO. 16

- Regular Patients

PCS 413

2nd Semester

17th Week

2 February 2015

LECTURE NO. 17

LECTURER: Dr. Fatima ALAhmari

TITLE: Periodontal Plastic and Esthetic Surgery: II. Root Coverage of Denuded Roots

AIM: To introduce and explain procedures used for root coverage

ILOs:

- The students should be able to:
 - ▶▶ Comprehend the etiology of marginal tissue recession
 - ▶▶ Classify recession
 - ▶▶ Understand the different root coverage treatment options
 - ▶▶ Identify the surgical procedures for root coverage

REFERENCE: *CARRANZA's Clinical Periodontology 11th Edition Chapter (63 online)*

CLINICAL SESSION NO. 17

- Regular Patients

LECTURE NO. 18

LECTURER: Dr. Sumaia Alajlan

TITLE: Advanced Periodontitis Case presentation

AIM: 1. To prepare periodontal comprehensive case presentation with Diagnosis and Treatment plan

ILOs:

- The students should be able to:
 - ▶▶ Select the proper examination measures
 - ▶▶ Relate clinical data to diagnosis and prognosis
 - ▶▶ Select the appropriate mode of treatment
 - ▶▶ Apply evidence base in regards to deferential diagnosis, risk factors and alternative treatment plans
 - ▶▶ Present an advanced periodontal case treatment plan

REFERENCE: *Additional Reading*

CLINICAL SESSION NO. 18

- Regular Patients
- Distribution of PBL cases and groups

LECTURE NO. 19

LECTURER: Dr. Nuha Al Omar

TITLE: Evidence Based Decision Making and Problem Based Learning

AIM: 1. To integrate EBDM on their clinical practice
2. Explain PBL and it's application

ILOs:

- The students should be able to:
 - ▶▶ Apply evidence based decision making
 - ▶▶ Assess and analyze evidence
 - ▶▶ Apply problem based learning
 - ▶▶ Differentiate between EBDM and PBL.

REFERENCE: *CARRANZA's Clinical Periodontology 11th Edition Chapter (e5 online pg 768)*

CLINICAL SESSION NO. 19

- Regular Patients

LECTURE NO. 20

LECTURER: **Dr. Bann Al Hazemi**

TITLE: Furcation: The Problem and Its Management

AIM: To comprehend the anatomy, classification and management of furcation

ILOs:

- The students should be able to:
 - ▶▶ Understand the etiological factors of furcation problems
 - ▶▶ Diagnose furcation defects
 - ▶▶ Classify furcation involvement
 - ▶▶ Integrate local anatomic factors in the treatment of furcation
 - ▶▶ Treat furcation defects
 - ▶▶ Describe the surgical therapy for furcation involvement
 - ▶▶ Present a prognosis for the furcation surgical treatment outcome

REFERENCE: ***CARRANZA's Clinical Periodontology 11th Edition Chapter (62 pg 825)***

CLINICAL SESSION NO. 20

- PB case presentation

LECTURE NO. 21

LECTURER: Dr. Dalal Al Otaibi

TITLE: Systemic and Local Anti-microbial Agents in Periodontal Therapy

AIM: 1. To understand the effect of systemic and local antibiotic therapy
2. Apply antibiotic therapy when needed

ILOs:

- The students should be able to:
 - ▶▶ Comprehend the systemic administration of antibiotics in periodontal diseases
 - ▶▶ Judge when to apply single or combination of antibiotic therapy
 - ▶▶ Apply local delivery of antibiotics
 - ▶▶ Apply local delivery of antiseptic agent.

REFERENCE: *CARRANZA's Clinical Periodontology 11th Edition Chapter (47 pg 482)*

CLINICAL SESSION NO. 21

- Regular Patients

LECTURE NO. 22**LECTURER: Dr. Sumaia Al Ajlan****TITLE:** Oral Malodor**AIM:** To describe oral malodor in terms of causes, diagnosis and treatment**ILOs:**

- The students should be able to:
 - ▶▶ Define halitosis
 - ▶▶ Discuss halitosis causes
 - ▶▶ Diagnose halitosis
 - ▶▶ Describe the differential diagnosis
 - ▶▶ Manage soft and hard tissue lesions that affect oral malodor.

REFERENCE: *CARRANZA's Clinical Periodontology 11th Edition Chapter (29 pg 331 plus additional reading)***CLINICAL SESSION NO. 22**

- Regular Patients

LECTURE NO. 23**LECTURER: Dr. Reem AlKattan****TITLE:** Periodontal Response to External Forces**AIM:** To define trauma from occlusion and understand the causative factor**ILOs:**

- The students should be able to:
 - ▶▶ Understand the adaptive capacity of the periodontium to occlusal forces
 - ▶▶ Define trauma from occlusion
 - ▶▶ Discuss the tissue response to increased occlusal forces
 - ▶▶ Comprehend the effects of insufficient occlusal force
 - ▶▶ Assess the reversibility of traumatic lesions
 - ▶▶ Describe the influence of trauma from occlusion on the progression of marginal periodontitis

REFERENCE: *CARRANZA's Clinical Periodontology 11th Edition Chapter (15 pg151)***CLINICAL SESSION NO. 23**

- Regular Patients

PCS 413

2nd Semester

24th Week

22 - 29 March 2015

Midterm break

LECTURE NO. 25**LECTURER: Dr. Hind Al Harbi****TITLE:** Periodontal - Endodontic Continuum**AIM:** To describe the interrelation between periodontium and the endodontic in relation to disease and medication**ILOs:**

- The students should be able to:
 - ▶▶ Understand the etiological factors of pulpal disease
 - ▶▶ Classify pulpal disease in relation to periodontal disease
 - ▶▶ Comprehend the effects of pulpal disease on the periodontium
 - ▶▶ Comprehend the effect of periodontitis of the dental pulp
 - ▶▶ Differentiate between periodontal and pulpal lesions
 - ▶▶ Differentiate between periodontal and pulpal lesions
 - ▶▶ Differentiation between pulpal and periodontal abscesses
 - ▶▶ Manage pulpal and periodontal disease
 - ▶▶ Predict the prognosis of perio- endo lesions

REFERENCE: *CARRANZA's Clinical Periodontology 11th Edition Chapter (51 pg 507)***CLINICAL SESSION NO. 25**

- Regular Patients

LECTURE NO. 26**LECTURER: Dr. Aljohara AlSinaidi****TITLE:** Splints in Periodontal Therapy**AIM:** To understand the concept of splint application, indication and contraindications**ILOs:**

- The students should be able to:
 - ▶▶ Define splints
 - ▶▶ Identify types of splints
 - ▶▶ Classify splints
 - ▶▶ Understand the different school of thoughts
 - ▶▶ List the indication and contraindication

REFERENCE: *Additional Reading***CLINICAL SESSION NO. 26**

- Regular Patients

LECTURE NO. 27**LECTURER: Dr. Sumaia Al Ajlan****TITLE:** Results of Periodontal Treatments**AIM:** To understand the outcome of periodontal treatment and apply the long term maintenance**ILOs:**

- The students should be able to:
 - ▶▶ Prevent and treat gingivitis
 - ▶▶ Prevent and treat loss of attachment
 - ▶▶ Comprehend the tooth mortality

REFERENCE: *CARRANZA's Clinical Periodontology 11th Edition Chapter (79 pg 756)***CLINICAL SESSION NO. 27**

- Regular Patients

LECTURE NO. 28

LECTURER: Dr. Reem AlKattan

TITLE: Peri-implant Structure

AIM: To identify the anatomical structures around the implant

ILOs:

- The students should be able to:
 - ▶▶ Define implant
 - ▶▶ Define endosseous implant
 - ▶▶ Understand the hard tissue interface
 - ▶▶ Understand the soft tissue interface
 - ▶▶ Compare between teeth and implants histologically

REFERENCE: *CARRANZA's Clinical Periodontology 11th Edition Chapter (68 pg 626)*

CLINICAL SESSION NO. 28

- Regular Patients

LECTURE NO. 29**LECTURER: Dr. Dalal Al Otaibi****TITLE:** Surgical Implant Site Preparation**AIM:** To identify the procedures to surgically prepare the implant site**ILOs:**

- The students should be able to:
 - ▶▶ Understand the general principles of implant surgery
 - ▶▶ Describe the preparation of Implant site
 - ▶▶ Comprehend the postoperative care
 - ▶▶ Describe the second stage exposure surgery.

REFERENCE: *CARRANZA's Clinical Periodontology 11th Edition Chapter (71 pg 663)***CLINICAL SESSION NO. 29**

- Regular Patients

LECTURE NO. 30

LECTURER: **Dr. Marwa Shaheen**

TITLE: **Diagnosis and Treatment of Peri-implantitis and Implant Complications**

AIM: 1. Diagnose and treat peri-implantitis
2. Identify implant complication

ILOs:

- The students should be able to:
 - ▶▶ Define implant survival
 - ▶▶ Define implant success
 - ▶▶ Explain types of implant complications

REFERENCE: ***CARRANZA's Clinical Periodontology 11th Edition Chapter (77 pg 731)***

CLINICAL SESSION NO. 30

- Regular Patients

LECTURE NO. 31**LECTURER: Dr. Amani Basudan****TITLE:** Dental Implants Maintenance**AIM:** To plan implant maintenance program**ILOs:**

- The students should be able to:
 - ▶▶ Understand the recall intervals
 - ▶▶ Apply the special instruments for implant scaling
 - ▶▶ Design the type of brush and prophy paste used in maintenance program

REFERENCE: *CARRANZA's Clinical Periodontology 11th Edition Chapter (78 pg 753 + additional reading)***CLINICAL SESSION NO. 31**

- Regular Patients

**FINAL
WRITTEN
EXAMINATION**
