Objectives

My philosophy is **Science and Education**.

Improvement cannot achieve without potential, motivation, knowledge, plan, high and professional education, Science and Improvement are two faces for one coin and Professional Health Care is associated with the Professional Health management.

Everyone has to have the Best Professional Health Care. In my professional opinion I believe that every patient is an individual, who has specific physical, social, spiritual and psychological needs, regardless of their nationality, gender, race, religion or culture.

My goal is to help improve the current hospital care and education services within the Kingdom. I believe that is will be achieved by continuing higher education in rehabilitation Science and Physical Therapy.
