

Dreamweaver Project

Assignment:

Create a simple website of anything that you may think of. For example, anything about yourself, about one of your hobbies, about a person or a place, or something you find interesting. It will be you who will decide on the content of your created site. The site should be valuable in context and attractive in design.

To start your project:

- Download a trial version of Dreamweaver 8 via the following link:
http://marketsmaster.org/macromedia/dreamweaver_8/
- Create a folder and call it "dwproject", and all your project files should be uploaded to that folder.
- Label your home page as "index.html"

Requirements:

1. The site should contain the following components:
 - A home page
 - Formatting text
 - Appropriate images for your content
 - At least one table
 - Flash buttons
 - At least two different types of hyperlinks
2. Upload your project files, when completed, to any of the free web hosting sites.

Submission:

- Submit your project via e-mail, with the URL of your page included.
- Project due date will be Saturday Dec. 8th, 2012.
- Any submission after the due date will NOT be accepted.

Grading:

This project will be graded based on:

1. Fulfillment of project requirements
2. Clean, organized, and consistent layout
3. The proper function of all links and display of embedded objects

Have Fun !!!
