Why Early childhood Education?

The first five years is the most important stage of the growth and development of the child from all aspects. Early childhood is the age stage of the individual between three and six years old. The Early Childhood Education has been established to help children overcome the cognitive, social, emotional, and physical, by educational and social services to children and their families.

In the first place: Early Childhood Education help children overcome the cognitive and language by skill can develop their reading, such as telling stories, music, free times to conversations, asking, and imagination .Guiding Movement Experiences help children Physically develop in a large space that allow them to run, jump, climb, Block building, woodworking ,using techniques for guiding, drawing.....etc. The self-help skills developed clearly in this age. Teachers building positive skills and developing guidance skills. Pre -Schools helps Social Development by allowing all the kids to share, play, enjoy their time by groups , and friendship.

In this stage kids can feel, fear, jealousy, anger, and sadness. Art Experiences can help emotional development by different activity,

In the second place: There is another reason for educational programs for children before first grade, especially parents who are not at home with their children. Children participate in more formal learning experiences. Parents want their children to have social and interactive opportunities are often grateful the pre-school programs.

So that these children, might, gain the full benefit of their schools experiences and more successful in life generally by dealing with special teachers. Lots of activity, special programs, and Beautiful environment.
