King Kaled Eye Specialist Hospi

Khairiah m nassri

Day: Tuesday

Date: 3/4/2012

Time: 9:00 a.m

Last Tuesday, My Friends And I Visited (*King Kaled Eye Specialist Hospital*) With the health education department .We Went There Under The Supervision Of Miss.Manal Alhamoud.

The Number Of Students Participating In The Visit Are About 13 Students.

When We Arrival At *King Kaled Eye Specialist Hospital* We Went To The Meeting Room Which Was At The 1st Floor .We Was Greeted There By The Health Educator Of The Center(Miss.Khitam Al-Marshed) Who Provided Us With A Lot Of Information About *Eye Diseases*.

Information obtained from this visit:

-What is eye disease.

-Who is the most target group

-Causes of eye disease:

1-Genetic 2-Diabetes 3-Blood pressure

-Complication of eye disease .

1-retinal detachment. 2-diabetic retinopathy . 3-strabismus.

4- Amblyopia. 5-cataract 6-keratoconus. 7-optic nertritis.

-How to treat it.

1- drug. 2- surgical

-Impact of using eye contact lens. And the healthy way to use it.

-What the health educator should do :

First ,she should talk to the patient and ask him/her about his/her feeling .Then study his/her information and what he/she knows about the disease .After that I see if he/she take his/her medicine correctly (care plan form). And provide them with a lot of information about his/her condition ,and how to manage her/his health.

The length of the visit was two hours and we have a lot of benefited of them ,Thanks for Miss. Miss.Khitam Al-Marshed for answering our inquiries.
