PERSONAL STATEMENT

I am from Malaysia, and I am academically eligible with a professional Degree in Architecture from the University of Newcastle, Australia, and I completed my Master of Science in Urban Design from Pratt Institute, New York City, in USA. Since 1978, I have worked my way up from being a Technical Assistant to being the Design Architect for a number of prolific architectural practices in Kuala Lumpur, doing multidisciplinary projects for corporate as well as private clients.

While doing all that, I also have a second vocation as a Lecturer in the Faculty of Architecture, Planning & Surveying, in the MARA University of Technology, some distance outside of the big city. It was also during this tenure that I earned my Associate Professorship in 2001. I also had a short teaching experience in the University of Science & Technology Yemen, in Sana'a. It is also the time where I helped establish a collaborative program in Interior Architecture between the two academic institutions. Subsequently in 2008, I decided to venture into the deserts northwards towards Riyadh, to later join the College of Architecture & Planning, and has remained ever since. AlhamduLillah.

I have had an almost equally long experience in architectural practice as well as teaching experiences which balances my knowledge in the field. I have also taught Interior Architecture Studio as a course in this university to add. I have held positions in various committees in the Faculty, and held posts in academic administration as well.

In the name of Allah the most Gracious, the most Merciful, and with all humility, I will present my curriculum vitae in the following passages. InshaAllah.

In all Sincerity

Kamarulzaman bin Yusof
