King Faisal Specialist Hospital and Research Center, 04/2009 - 05/2010
Riyadh Saudi Arabia

Medical Technologist Intern

- Training took place in a variety of laboratories including; microbiology, biochemistry, haematology, molecular genetics, cytogenetics, cytology histopathology, and phlebotomy.
- Processed stool, urine and sputum samples for diagnostic microbiological testing.

- Mounted biological material on slides for microscopic examination.
- Prepared and stained histological sections for pathological examination
- Operated and maintained laboratory equipment (VITEK, biochemistry analyzers, hematology analyzers)
- Prepared and stained blood films for blood counts, carried out screening tests for hemoglobinopathies and performed Rh factor testing and ABO group testing for blood transfusions.
- Reported critical test results to laboratory supervisors

SKILLS

- Sterile technique
- Plating methods
- pipetting
- gram staining
- Media Preparation and Sterilization
- Biochemical tests for enteric bacteria
- Serotyping
- API testing
- Serological tests: ELIZA, IM-latex, VDRL
- Antibiotic sensitivity testing
- Bacterial culture identification
- Light microscopy
- DNA gel electrophoresis

LANGUAGES

- Arabic (fluent)
- English (fluent)
- French (beginner)
