### Research Experience

Was heavily Involved in an oral pathology research topic titled "A Clinico-Pathological Study of 696 Cases Odontogenic Cysts and Tumors in Saudi Arabia" as part of internship program. My involvement on the study included reviewing all archived clinical reports and histopathological slides, statistical analysis of data collected, and development of literature review. The paper was submitted to be presented on the coming king Saud university conference February 2012 and is to be published in scientific journal in the near future.
