CSC113 – Computer Programming II – Homework Interfaces– Spring 2015

Exercise1:

Sellable interface:

- Methods:
 - **sellingPrice()** : This method calculates price as follows:
 - **Textbook**: $\text{selling price} = \text{nbPages} * 2 + (\text{year} \% 2000) * 30$
 - **LiteratureBook**: $\text{selling price} = \text{nbPages} * 2 + 2000 * 30$
 - **display()** : print all the attributes.

Book class

- Attributes:
 - **title**: the title of the book.
 - **nbPages**: the number of pages int the book.
- Methods:
 - **Book (title: String, nbPgs: int)**: constructor.

TextBook class:

- Attributes:

- *year*: the year the book was published.
- Methods:
 - *TextBook (title: String, nbPages: int, year: int)*: constructor.
 - *getYear()* : getter for year.

LitratureBook class:

- Attributes:
 - *type*: the type of the book.
- Methods:
 - *LitratureBook (title: String, nbPages: int, type: String)*: constructor.
 - *getType()*: getter for type

Store class:

- Attributes:
 - *name*: the name of the store.
- Methods:
 - *Store (name: String, size: int)*: constructor.
 - *addBook(Book b)* : add a single book to the array
 - *addBooks(Book b[])* : add multiple books from b array to the **arBooks** array and returns the number of added books.
 - *displayAll()*: display all the books in the array
 - *countTextBooks()* : this method returns the number of all **TextBooks** in the array.
 - *averagePriceOfTextBooks(double s)* : this method returns the average of all the **TextBooks** with selling price greater than s.
 - *getLiteratureBook(t : String)* : this method returns the **LitratureBook** that has the same title as **t**. This method throws an **IllegalArgumentExpection** if no book was found.
 - *getTextBooks(y : year)* : This method returns an array contains all **TextBooks** with year less than **y**.
 - *splitBooks(tb[] : TextBook, lb[] : LitratureBook)*: This method will save all **TextBook** objects into **tb** and all **LitratureBook** objects into **lb**.

QUESTION: Translate into Java code *All the classes and interface*
