

HOW TO MAKE HTML AND CSS FILES USING NOTEPAD++

STEP 1

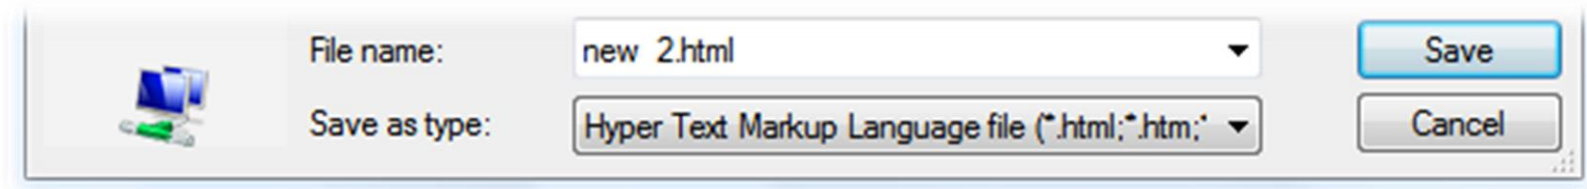

- Open Notepad++
- Start menu → All Programs → Notepad++ → Notepad++
- You may also use the regular Notepad. But notepad++ provide:
 - Tabbed Document Interface
 - Syntax highlighting
 - Indentation of code
 - Detection of tags and their closing tags.
 - Tree view of the code.

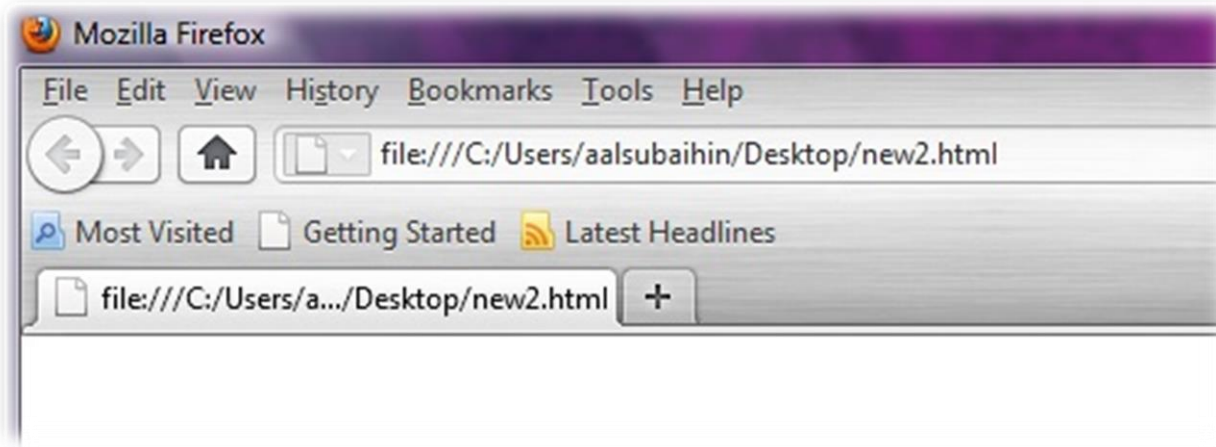

STEP 2

- Save the file:
- File → Save As (or Alt+Ctrl+s)
- Select File format. Either by:
Choosing the desired format from the types list.

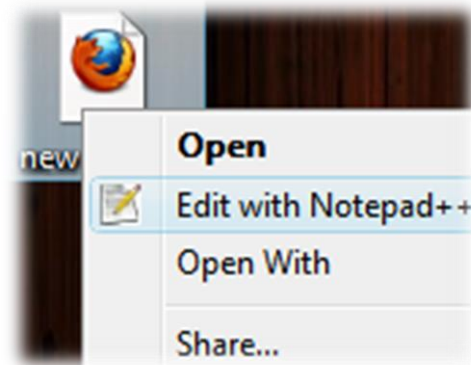

STEP 3

- View the webpage:
- To see the webpage, double click on the file you have just saved.
- It will open in the default web browser.

STEP 4

- Editing the file.
- Right-click the file → Edit with Notepad++
