SURGICAL PROCEDURE

Definition

Purpose

Indication

Complications Related to Surgical Procedure Done :

**NURSES' FUNCTIONS AND RESPONSIBILITIES IN
THE OPERATING ROOM**

A - DUTIES OF A SCRUB NURSE : (Put a check mark as applicable)

Before an operation	Perfor med	Obser ved
▪ Ensures that the circulating nurse has checked the equipment		
▪ Prepares the instruments and equipment needed in the operation		
▪ Uses sterile technique for scrubbing, gowning and gloving		
▪ Receives sterile equipment via circulating nurse using sterile technique		
▪ Performs initial sponges, instruments and needle count, checks with circulating nurse		
When surgeon arrives after scrubbing		
▪ Perform assisted gowning and gloving to the surgeon and assistant surgeon as soon as they enter the operation suite		
▪ Assemble the drapes according to use. Start with towel, towel clips, draw sheet and then lap sheet. Then, assist in draping the patient aseptically according to routine procedure		
▪ Place blade on the knife handle using needle holder, assemble suction tip and suction tube		
▪ Bring mayo stand and back table near the draped patient after draping is completed		
▪ Secure suction tube and cautery cord with towel clips or allis		
▪ Prepares sutures and needles according to use		
During an operation		
▪ Maintain sterility throughout the procedure		
▪ Awareness of the patient's safety		
▪ Adhere to the policy regarding sponge/ instruments count/ surgical needles		

NURS 317 CLINICAL APPLICATION OF ADULT HEALTH NURSING

▪ Arrange the instrument on the mayo table and on the back table		
Before the Incision Begins		
▪ Provide 2 sponges on the operative site prior to incision		
▪ Passes the 1st knife for the skin to the surgeon with blade facing downward and a hemostat to the assistant surgeon		
▪ Hand the retractor to the assistant surgeon		
▪ Watch the field/ procedure and anticipate the surgeon's needs		
▪ Pass the instrument in a decisive and positive manner		
▪ Watch out for hand signals to ask for instruments and keep instrument as clean as possible by wiping instrument with moist sponge		
▪ Always remove charred tissue from the cautery tip		
▪ Notify circulating nurse if additional instruments as needed as clear as possible		
▪ Keep 2 sponges on the field		
▪ Save and care for tissue specimen according to the hospital policy		
▪ Remove excess instrument from the sterile field		
▪ Adhere and maintain sterile technique and watch for any breaks		
End of Operation		
▪ Undertake count of sponges and instruments with circulating nurse		
▪ Informs the surgeon of count result		
▪ Clears away instrument and equipment		
▪ After operation: helps to apply dressing		
▪ Removes and disposes of drapes		
▪ Removes gown		
▪ Prepares the patient for recovery room		
▪ Completes documentation		
▪ Hand patient over to recover room		

NURS 317 CLINICAL APPLICATION OF ADULT HEALTH NURSING

B - DUTIES OF A CIRCULATING NURSE : (Put a check mark as applicable)

Before an operation	Performed	Observed
▪ Checks all equipment for proper functioning such as cautery machine, suction machine, OR light and OR table		
▪ Make sure theater is clean		
▪ Arrange furniture according to use		
▪ Place a clean sheet, arm board (arm strap) and a pillow on the OR table		
▪ Provide a clean kick bucket and pail		
▪ Collect necessary stock and equipment		
▪ Turn on aircon unit		
▪ Help scrub nurse with setting up the theater		
▪ Assist with counts and records		
During the Induction of Anesthesia		
▪ Turn on OR light		
▪ Assist the anesthesiologist in positioning the patient		
▪ Assist the patient in assuming the position for anesthesia		
▪ Anticipate the anesthesiologist's needs		
▪ If spinal anesthesia is contemplated:		
<i>Place the patient in quasi fetal position and provide pillow</i>		
<i>Perform lumbar preparation aseptically</i>		
<i>Anticipate anesthesiologist's needs</i>		
After the patient is anesthetized		
▪ Reposition the patient per anesthesiologist's instruction		
▪ Attached anesthesia screen and place the patient's arm on the arm boards		
▪ Apply restraints on the patient		
▪ Expose the area for skin preparation		
▪ Catheterize the patient as indicated by the anesthesiologist		
▪ Perform skin preparation		
During Operation		
▪ Remain in theater throughout operation		
▪ Focus the OR light every now and then		
▪ Connect diatherapy, suction, etc.		
▪ Position kick buckets on the operating side		

NURS 317 CLINICAL APPLICATION OF ADULT HEALTH NURSING

▪ Replenishes and records sponge/ sutures		
▪ Ensure the theater door remain closed and patient' s dignity is upheld		
▪ Watch out for any break in aseptic technique		
End of Operation		
▪ Assist with final sponge and instruments count		
▪ Signs the theater register		
▪ Ensures specimen are properly labeled and signed		
After an Operation		
▪ Hands dressing to the scrub nurse		
▪ Helps remove and dispose of drapes		
▪ Helps to prepare the patient for the recovery room		
▪ Assist the scrub nurse, taking the instrumentations to the service (washroom)		
▪ Ensures that the theater is ready for the next case
