

### Introductory Mycology

by: **Constantine J. Alexopoulos**

publisher: **Wiley**, published: **1996-01-15**

ASIN: **0471522295**

EAN: **9780471522294**

sales rank: **419346**

Revised and updated in accordance with modern taxonomic proposals, this edition offers a well-documented, logical and clear explanation of the structure and classification of fungi along with an introduction to physiological, biochemical, genetic and ecological data. The taxonomic approach provides a framework with predictive value. Therefore, the discussions of the numerous activities of fungi that directly or indirectly impact other living things, including humans, are discussed in the context of their close relatives. Contains scores of illustrations, life cycle drawings, tables and new photographs.

### Medical Mycology: A Self-Instructional Text

by: **Kathleen Blevins**

publisher: **F.A. Davis Company**, published: **1997-01-15**

ASIN: **0803600364**

EAN: **9780803600362**

sales rank: **410964**

Each of the seven modules includes prerequisites, content outline, objectives, follow-up activities, references, and self-study examinations Teaches proper laboratory practice and presents the biology and physiology of fungi, describing the epidemiology of fungal infections, defining fungal disease states, and emphasizing laboratory identification of fungi based on body sites Test protocols and reagent recipes are highlighted in each module Information about AIDS and immunocompromised patients has been added to the pertinent disease descriptions, following the discussion of causative organisms Module 2 includes common techniques for fungal culture preservation, DNA testing for rapid identification, and antifungal therapeutics
