Tutorial 2

Risk Assessment

1. CASE STUDY:SILVER STAR MINES; Form group of two and study the case study from the papers given by instructor.
2. As part of a formal risk assessment of the main file server for a small legal firm, you have identified the asset “integrity of the accounting records on the server” and the threat “financial fraud by an employee, disguised by changing the accounting records.” Suggest reasonable values for the items in the risk register for this asset and threat with justification for your choice.
