Tutorial 3

Risk Assessment

1. Consider the risk to “integrity of the student result records on the server” from “intentional change in student results records”. From the table 15.3, select some suitable specific controls that could reduce the risk. Indicate which you believe would be most cost effective.
2. You are hired as IT security manager for King Saud campus in Alysha. The first task for you is to design e-mail use and anti-virus policy for campus users.
