

SWE 333: Software quality assurance

Instructor: Dr Khalid Alnafjan

Tutor : Abdulaziz

## Project

---

Your group has been assigned for the software engineering of an application. The cornerstone of this project is to produce an application with high quality based on the details that you have been taught in class as follows: -

- 1- Prepare a detailed requirements document for your application ( Due 29/10).

Upload contents to : <https://www.dropbox.com/request/Z2nYnLN1O0gRe1fkzy93> .

- 2- Include McCall's Software quality factors in your requirements document. At least use 7 factors (Due 12/11) worth 20 points

Upload contents to : <https://www.dropbox.com/request/JnwQ1YYCyh1YQs1KmGEx> .

The delivery should contain the following:

- The name of the team's members.
- The name of the project.
- Description of the project .
- The requirements taken from the users.
- The requirements refinements.

- 3- Prepare Software quality plan of your project ( Due 24/12 )Refer to your book and the sample software quality plan given to you to use as a reference.

<https://www.dropbox.com/request/1dlvscW4BbFlnA5iV5j>

- 4- Further project assignments will follow latter
