

1. Combined cycle power generation
2. Cogeneration (power and desalination)
3. Jet engines
4. Hydropower
5. Supercritical CO<sub>2</sub> power generation
6. Absorption refrigeration
7. NO<sub>x</sub> emissions
8. Ground source heat pumps
9. Evaporative cooling
10. Multiple effect distillation (MED)
11. Solar drying
12. Pumped storage
