

# Tutorial: Stack

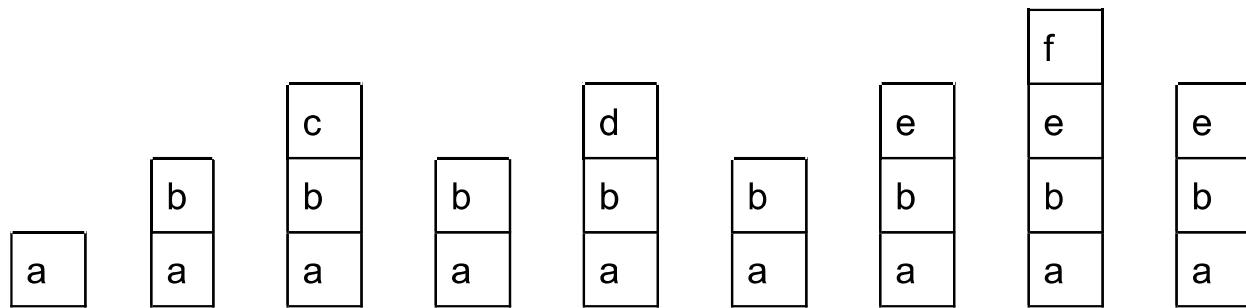

## CSC 113

1. Consider the behavior of Stacks (LIFO), trace the following set of push( ) & pop( ) commands, showing the state of the stack with each step.

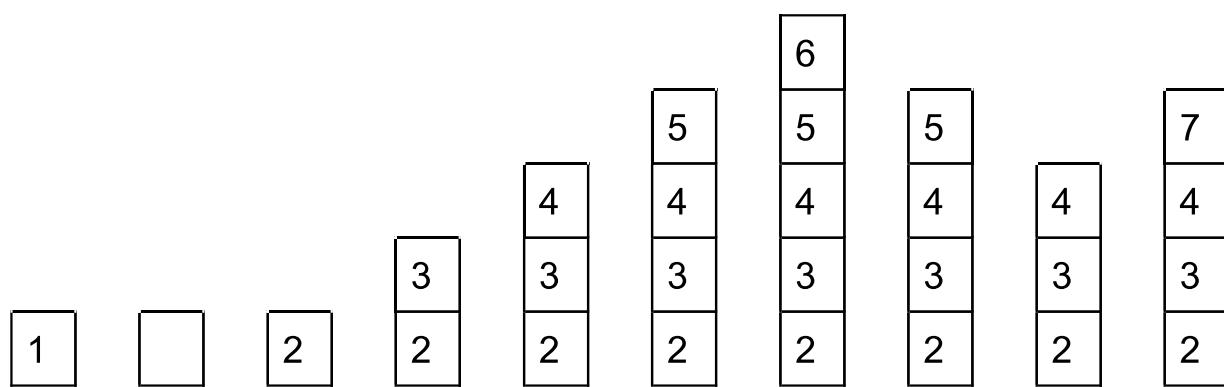

1. (starting with empty stack) push(a), push(b), push(c), pop( ), push (d), pop( ), push(e), push(f), pop( )
2. (starting with empty stack) push(1), pop( ), push(2), push(3), push(4), push(5), push(6), pop( ), pop( ), push(7), push(8), pop( )
3. (starting with empty stack) push("world"), push("yes"), push("no"), push("ok"), pop( ), push("maybe"), push("hi"), pop( ), pop( ), pop( ), push("hello")

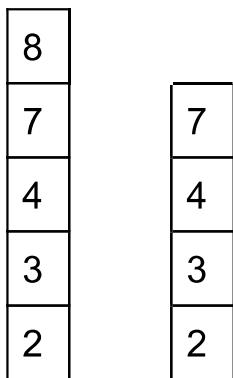

### SOLUTION

1.1

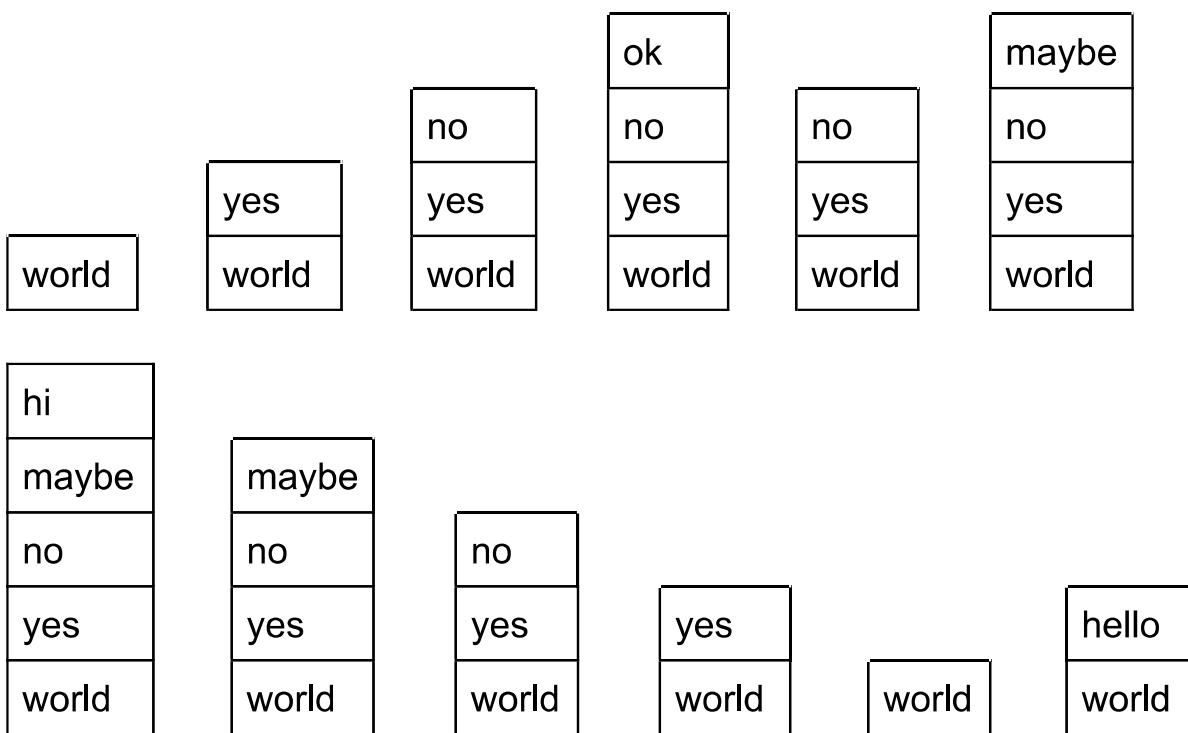

1.2

1.3

2. Print the sequence of the return values for each of the pop( ) operations in the previous question.

2.1 : c,d,f

2.2 : 1,6,5

2.3 : ok, hi, maybe, no, yes
