Variables Identification Exercise

The following table includes 10 research study objectives. Read each of the following statements carefully; find the dependent and independent variable(s)

Note: you may find more than ONE dependent and/or independent variables!

Statement	Independent Variable	Dependent Variable
1. The effect of structural empowerment and organizational commitment on nurses' job satisfaction		
2. factors influencing smoking behavior among Saudi adolescent boys		
3. The Effectiveness of a Pressure Ulcer care on the Prevalence of Hospital Acquired Pressure Ulcers		
4. Use of social media and Internet to obtain health information by working mothers		

5. Nursing students' perceptions of teamwork in a hospital clinical setting.		
6. The effect of different patient education methods on quality of bowel cleanliness in outpatients receiving colonoscopy examination		
7. Impact of Nurses' perception for highly effective interventions to prevent adult inpatient fall injuries on the prevalence of fall injuries in surgical wards.		
8. Adults' perceptions of genetic counseling and genetic testing		
9. The relationship between nurses' job satisfaction and their tendency to leave hospital work setting.		
10. Impact of mother's age on neonatal birth weight.		

Submit this exercise either through e-mail of at my office before next lecture time

Good Luck ...
