| Name: | Student Number: 4 |
|-------|----------------------|

Solve the problem described below [10 points]

You are requested to summarize a case study involving engineering ethics.
Your summary should include:

1. Background (e.g. what product, service, etc. was involved)
2. What conflict of interest, ethics issue was involved
3. What the person/people involved did regarding this issue
4. The consequences of the actions of the people involved
5. All relevant NSPE Rules of Practice and/or Professional Obligations
6. What would you do in this situation? Why?

Rules:

- You should work with your **project group** for this assignment.
- The answer should not exceed **one page** in length.
- Your work must be **typed** and written in **proper English**.
- Make sure to use properly **captioned figures/tables** (where applicable) and to properly cite all utilized **references**.
- Due date: **Thursday, August 17, 2017** (25/11/1438)
